

Padma P V

Undergraduate | AI and Data Science Engineering Student

Ph:8296327338 | padmavenugopal28@gmail.com | [linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

Final-year Artificial Intelligence and Data Science engineering student with hands-on experience in developing full-stack, AI-powered applications using technologies such as NLP, computer vision, and large language models. Passionate about building intelligent solutions and continuously enhancing skills in AI, backend, and mobile application development. Currently gaining industry experience through a fellowship internship at Syntent Technologies while contributing to innovative, real-world projects.

INTERNSHIP EXPERIENCE

Data Science Intern — Syntent Technologies

Fellowship Program | 1 Month | Started July 2026

- Selected for a competitive fellowship internship; completed a structured onboarding phase covering 1 month of applied analytics and machine-learning workflows under direct supervisor mentorship.
- Applied statistical analysis and machine-learning fundamentals to live business problems, translating classroom concepts into practical, industry-aligned deliverables.

EDUCATION

SJC Institute of Technology (VTU) — Chickballapur, Karnataka

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science (cgpa-8.53 till 6th Sem)

2023-Expected 2027

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Natural Language Processing, Mobile App Development.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, C.

AI / ML & Analytics: NLP (SpaCy, NLTK), LLMs, EDA, Power BI.

Developer Frameworks: MongoDB, Git/GitHub.

PROJECTS

AI-Powered Resume Analyzer & Career Roadmap Generator | Capstone Project (on going)

Stack: React.js, Flask, SpaCy, NLTK, PyMuPDF, OpenAI/Gemini API, MongoDB

- Engineered an automated NLP pipeline using SpaCy and NLTK that parses and extracts core technical competencies from resumes, reducing manual screening time by 40%.
- Built and optimized an LLM-based job-role prediction model that improved candidate-role alignment accuracy to 92% on a held-out validation set.
- Developed an interactive UI/UX frontend delivering personalized, week-by-week learning roadmaps spanning 6+ skill categories based on identified competency gaps.

VoiceForAll – Multimodal Healthcare Chatbot | Personal Project | Hackathon

Stack: Flask, Claude API, Whisper, MediaPipe Hands, React.js, Google Places API

- Built a cyber-physical interaction layer combining sign-language gesture recognition (MediaPipe) and audio transcription (Whisper) across 3 input modes to expand app accessibility for hearing- and speech-impaired user groups.
- Optimized a Flask backend integrating the Claude API, cutting response latency to under 1.5 seconds for real-time conversational healthcare guidance.
- Designed a responsive interface focused on intuitive UI/UX navigation, enabling nearby-facility lookups within a 5 km radius via the Google Places API.

ACHIEVEMENTS & CAMPUS LEADERSHIP

- Secured 2nd place** among competing teams at a 24-hour hackathon hosted at SJC Institute of Technology for developing an innovative tech solution under strict deadline pressure.
- Completed** Natural Language Processing Fundamentals via Infosys Springboard (May 2026).
- Completed** the NPTEL Python for Data Science course (Jan–Feb 2026).
